Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

valve (II) comprising a valve housing, a switchable valve insert (16) that is accommodated therein, connections for a high-pressure conduit that is connected to the annular space of the hydraulic cylinder, and a connection for an additional unit (end position damping 15), the valve housing being fixable on the hydraulic cylinder (1), and the connections on the valve housing, in its fixed position on the hydraulic cylinder, extending parallel to the axis of the hydraulic cylinder.

2.2 Claim 1 is not clear and does not meet the requirements of PCT Article 6 because the subject matter for which protection is sought is not clearly defined. The claim attempts to define the valve by means of features of a hydraulic cylinder which is not claimed. The following statements do not make it possible for a person skilled in the art to determine which technical features are necessary in order to perform the functions referred to:

2.2.1 'Connections for high-pressure conduits that are joined to the cylinder chamber and/or the annular space of the hydraulic cylinder.'

2.2.2 'The valve housing can be fixed on the hydraulic cylinder.'
